

Serial No. 09/214,971
Amendment Dated: March 5, 2005
In response to Office Action Dated November 5, 2004

PATENT
Docket No. 58009-011900

CLAIM AMENDMENTS

Claim 1 (cancelled)

Claim 2 (cancelled)

Claim 3 (cancelled)

Claim 4 (cancelled)

Claim 5 (cancelled)

Claim 6 (cancelled)

Claim 7 (cancelled)

Claim 8 (currently amended): A method of using a composite material, comprising:

a supporting material constituted by scraps of natural leather in the form of a sheet or a roll; ~~constituted by natural leather~~

and a covering layer including a film of polyethylene, to provide a composite material of only two materials, the materials being the natural leather and the polyethylene film; and

the composite being for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chair or sofa elements or structures or furniture or furnishing elements, and including the step of forming the material into a shape to produce at least one of the products.

Claim 9 (previously presented): A method as claimed in claim 8 including the step of cutting the composite material to form the product.

Claim 10 (cancelled)

Claim 11 (cancelled)

Claim 12 (cancelled)

Claim 13 (currently amended): A method of using composite material, comprising:

Serial No. 09/214,971

PATENT
Docket No. 58009-011900

~~a supporting material in the form of sheet or roll constituted by one of the following materials:~~

~~a reconstructed leather material or a natural leather;~~

a supporting material constituted by scraps of natural leather in the form of a sheet or a roll;

a covering surface layer including a polyethylene film;

there being no foam between the natural leather and film; and

the composite being for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chair or sofa elements or structures or furniture or furnishing elements, and including the step of forming the material into a shape to produce at least one of the products.

Claim 14 (previously presented): A method as claimed in claim 8 including the step of cutting the composite material to form the product.

Claim 15 (cancelled)

Claim 16 (cancelled)

Claim 17 (cancelled)

Claim 18 (currently amended): A method of using composite material, comprising:

~~a supporting material in the form of sheet or roll constituted by one of the following materials:~~

~~a reconstructed leather material or a natural leather;~~

a supporting material constituted by scraps of natural leather in the form of a sheet or a roll;

a covering surface layer including a polyethylene film;

the natural leather being directly coupled to the film; and

the composite being for producing a product being selectively footwear sole and/or heel and/or vamp and/or toe, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chair or sofa elements or structures or furniture or furnishing elements, and including the step of forming the material into a shape to produce at least one of the products.

Docket No. 58009-011900

Claim 19 (previously presented): A method as claimed in claim 8 including the step of cutting the composite material to form the product.

Claim 20 (cancelled)

Claim 21 (cancelled)

Claim 22 (cancelled)

Claim 23 (cancelled)

Claim 24 (previously presented): A method of claim 8 including cold bonding the film layer, the film layer not being extruded directly onto the leather.

Claim 25 (previously presented): A method of claim 8 including applying an adhesive between the film layer and the leather.

Claim 26 (previously presented): A method of claim 8 including hot bonding the film layer, the film layer not being extruded directly onto the leather.

Claim 27 (previously presented): A method of claim 8 including effecting the embossing on the film layer during the bonding.

Claim 28 (previously presented): A method as claimed in claim 8 including interposing a dyestuff layer between the film layer and the leather.

Claim 29 (previously presented): A method as claimed in claim 8 including spraying a leather scent to the material.

Claim 30 (previously presented): A method as claimed in claim 8 including forming a series of perforations to the composite material.

Claim 31 (currently amended): A method of using a composite material, comprising:

~~a supporting material in the form of sheet or roll constituted by a mixture of a reconstructed natural leather material;~~

Serial No. 09/214,971
Amendment Dated: March 5, 2005

PATENT
Docket No. 58009-011900

a supporting material constituted by a mixture of regenerated natural leather material in the form of sheet or roll; and

a covering surface layer including a film of polyethylene, to provide a composite material of only two materials, the materials being the natural leather and the polyethylene film; ~~and~~

the composite being for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chair or sofa elements or structures or furniture or furnishing elements, and including the step of forming the material into a shape to produce at least one of the products.

Claim 32 (currently amended): A method of using composite material, comprising:

~~a supporting material in the form of sheet or roll constituted by one of the following materials:~~

~~a reconstructed natural leather material;~~

a supporting material constituted by a mixture of regenerated natural leather material in the form of sheet or roll; and

a covering surface layer including a polyethylene film;

there being no foam between the reconstructed natural leather material and film; and

the composite being for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chair or sofa elements or structures or furniture or furnishing elements, and including the step of forming the material into a shape to produce at least one of the products.

Claim 33 (currently amended): A method of using composite material, comprising:

~~a supporting material in the form of sheet or roll constituted by one of the following materials:~~

~~a reconstructed natural leather material;~~

a supporting material constituted by a mixture of regenerated natural leather material in the form of sheet or roll; and

a covering surface layer including a polyethylene film;

the reconstructed natural leather material being directly coupled to the film; and

the composite being for producing a product being selectively footwear sole and/or heel and/or vamp and/or toe, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chair or sofa elements or structures or furniture or furnishing elements, and including the step of forming the material into a shape to produce at least one of the products.

Claim 34 (previously presented): A method as claimed in claim 31 including spraying a leather scent to the material.

Claim 35 (previously presented): A method as claimed in claim 32 including spraying a leather scent to the material.

Claim 36 (previously presented): A method as claimed in claim 33 including spraying a leather scent to the material.

Claim 37 (withdrawn): A method of forming a composite material, comprising:

providing a supporting material in the form of sheet or roll constituted by a mixture of a reconstructed leather material or natural leather and an embossed covering surface layer including a film of polyethylene, to provide a composite material of only two materials, the materials being the supporting material and the polyethylene film; and the composite being for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chairs or sofas elements or structures or furniture or furnishing elements; and

forming the material into a shape to produce at least one of the products.

Claim 38 (withdrawn): A method of forming a composite material, comprising:

providing a supporting material in the form of sheet or roll constituted by one of the following materials;

a reconstructed leather material or natural leather;

a covering surface layer including a polyethylene film;

there being no foam between the supporting material and film;

the composite being for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chairs or sofas elements or structures or furniture or furnishing elements; and

forming the material into a shape to produce at least one of the products.

Claim 39 (withdrawn): A method of forming a composite material, comprising:

providing a supporting material in the form of sheet or roll constituted by one of the following materials:

a reconstructed leather material or natural leather;

a covering surface layer including a polyethylene film;

the supporting material being directly coupled to the film;

the composite being for producing a product being selectively footwear sole and/or heel and/or vamp and/or toe, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chair or sofa elements or structures or furniture or furnishing elements; and

forming the material into a shape to produce at least one of the products.

Claim 40 (withdrawn): A method as claimed in claim 37 including the step of cutting the composite material to form the product.

Claim 41 (withdrawn): A method of claim 37 including cold bonding the film layer, the film layer not being extruded directly onto the leather.

Claim 42 (withdrawn): A method of claim 37 including applying an adhesive between the film layer and the leather.

Claim 43 (withdrawn): A method of claim 37 including hot bonding the film layer, the film layer not being extruded directly onto the leather.

Claim 44 (withdrawn): A method of claim 37 including effecting the embossing on the film layer during the bonding.

Claim 45 (withdrawn): A method as claimed in claim 37 including interposing a dyestuff layer between the film layer and the leather.

Claim 46 (withdrawn): A method as claimed in claim 37 including spraying a leather scent to the material.

Docket No. 58009-011900

Claim 47 (withdrawn): A method as claimed in claim 37 including forming a series of perforations to the composite material.

Claim 48 (withdrawn): A method of forming a composite material, comprising:

providing a supporting material in the form of sheet or roll constituted by a mixture of a reconstructed leather material; an embossed covering surface layer including a film of polyethylene, to provide a composite material of only two materials, the materials being the supporting material and the polyethylene film; and the composite being for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chairs or sofas elements or structures or furniture or furnishing elements; and

forming the material into a shape to produce at least one of the products.

Claim 49 (withdrawn): A method of using composite material, comprising:

providing a supporting material in the form of sheet or roll constituted by one of the following materials:

a reconstructed leather material;

a covering surface layer including a polyethylene film;

there being no foam between the supporting reconstructed leather material and film;

the composite being for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chairs or sofas elements or structures or furniture or furnishing elements; and

forming the material into a shape to produce at least one of the products.

Claim 50 (withdrawn): A method of forming a composite material, comprising:

providing a supporting material in the form of sheet or roll constituted by one of the following materials:

a reconstructed leather material;

a covering surface layer including a polyethylene film;

the supporting material being directly coupled to the film;

the composite being for producing a product being selectively footwear sole and/or heel and/or vamp and/or toe, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chair or sofa elements or structures or furniture or furnishing elements; and
forming the material into a shape to produce at least one of the products.

Claim 51 (withdrawn): A composite material for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chairs or sofas elements or structures or furniture or furnishing elements, comprising:

a supporting material in the form of sheet or roll constituted by a mixture of a reconstructed leather material or natural leather an embossed covering surface layer; and

a film of polyethylene, to provide a composite material of only two materials, the materials being the supporting material and the polyethylene film.

Claim 52 (withdrawn): A composite material the composite being for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chairs or sofas elements or structures or furniture or furnishing elements, and the material comprising:

a supporting material in the form of sheet or roll constituted by one of the following materials;

a reconstructed leather material or natural leather;

a covering surface layer including a polyethylene film; and

there being no foam between the supporting material and film.

Claim 53 (withdrawn): A composite material being for producing a product being selectively footwear sole and/or heel and/or vamp and/or toe, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chair or sofa elements or structures or furniture or furnishing element, comprising:

a supporting material in the form of sheet or roll constituted by one of the following materials:

a reconstructed leather material or natural leather;

a covering surface layer including a polyethylene film; and

the supporting material being directly coupled to the film.

Claim 54 (withdrawn): A composite material for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chairs or sofas elements or structures or furniture or furnishing elements, comprising:

a supporting material in the form of sheet or roll constituted by a mixture of a reconstructed leather material; an embossed covering surface layer; and

a film of polyethylene, to provide a composite material of only two materials, the materials being the supporting material and the polyethylene film.

Claim 55 (withdrawn): A composite material being for producing a product being selectively footwear soles and/or heels and/or vamps and/or toes, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chairs or sofas elements or structures or furniture or furnishing elements, comprising:

a supporting material in the form of sheet or roll constituted by one of the following materials:

a reconstructed leather material;

a covering surface layer including a polyethylene film; and

there being no foam between the supporting material and film.

Claim 56 (withdrawn): A composite material being for producing a product being selectively footwear sole and/or heel and/or vamp and/or toe, and/or suitcase elements and/or spectacle-cases and/or briefcases, and/or chair or sofa elements or structures or furniture or furnishing elements, comprising:

a supporting material in the form of sheet or roll constituted by one of the following materials:

a reconstructed leather material;

a covering surface layer including a polyethylene film; and

the supporting material being directly coupled to the film.
